

INSTITUTIONAL DISTINCTIVENESS

Since its inception, Sazolie College has been striving to fulfil its vision, “to provide quality education through an intensive system of education”. Accordingly, various relevant programmes and activities have been conducted and introduced in the College over the years to aid in the positive growth and development of the students and to achieve the goals and aspirations of the institution enshrined in its vision and mission statements.

The College has excellent infrastructure and facilities. There are hostels for both boys and girls. There is a computer lab and a well-equipped psychology lab and college library. The environment of the College is ideal for academic activities and the College has produced many toppers in the university exams over the years.

A state-level inter-collegiate debate competition was started in 2006 with the aim to improve the power of comprehension and expression of the students. It has also provided a platform for students in the state to voice out their opinions on various relevant and important issues.

The Annual Lecture was started in 2013 with the aim to broaden the outlook and world view of students and teachers, and enable to look at people and things from a wider perspective. Prominent personalities from various professions and backgrounds have been invited to speak on various subjects and issues.

The College strives to emphasise on the importance of maintaining physical fitness. For this, apart from the annual sports week, various sports activities are organised throughout the year. There is a Taekwondo Club, a Badminton Club and a Basketball Team and students have participated and won at various levels including national and international levels. The College has been crowned Overall Champions for five times in the Nagaland University Sports Meet. In 2009, the College also hosted the NU Air Rifle and Air Pistol Competition.

To inculcate in the students a sense of social responsibility, various extension activities like cleaning of public places, visiting orphanage, old-age homes, prisons and special schools are conducted throughout the semester. The clubs and organisations of the College are: NSS, RRC, Young Indians, Sazolie College Fellowship, Eco-Club, Students' Council, Women Cell, Parents-Teachers Forum, Badminton Club, Taekwondo Club, Drama Club and Alumni Association. The different organisations and departments are encouraged to conduct at least one extension activity in an academic session. Some of the activities conducted and organised by the College and the different departments, organisations and committees are: seminars on various topics, leadership trainings, educational tours, blood donation drives, cultural programmes, career guidance workshops/seminars, environmental awareness activities like tree plantation, cleanliness drives etc.

Apart from the usual daily classes the College conducts mentoring classes for students thereby providing additional guidance and supervision. The students are divided into groups of about thirty each and they are assigned to the teachers who will mentor them throughout the academic session. Every semester, remedial classes are also conducted for students with backlog in the previous exams to prepare and enable the weaker students to clear their exams.
